LABOR LEADERS HEAR COOLIDGE

Would Keep America American, He Declares.

AGAINST ANY FOREIGN IDEAS

President Pledges to Perpetuate Conditions Which he Holds Are the Best In the History of American Wage Earners—Adds He Is For "Common Sense Government by All the People."

Washington, Sept. 2.—Three candidates selected Labor day for the real beginning of the presidential campaign.

President Coolidge addressed a delegation of friendly labor leaders at the white house at noon and in the afternoon John W. Davis, the Democratic candidate, spoke at a labor picnic at Wheeling, W. Va. Robert M. La Follette, independent candidate, made a radio talk to labor from Washington.

President Coolidge in his address to labor leaders said:

"American wage earners are living better than at any other time in our history. If anything is to be done by the government for the people who toil for the cause of labor, which is the sum of all other causes, it would be by continuing its efforts to provide healthful surroundings, education, reasonable conditions of employment, fair wages for fair work, stable business prosperity and the encouragement of religious worship.

"We do not need to import any foreign economic ideas or any foreign government. We had better stick to the American brand of government, the American brand of equality and the American brand of wages. America had better stay American.

"We have outlawed all artificial privilege. We have had our revolution and reforms. I do not favor a corporation government, a bank government, a farm government or a labor government. I am for a common-sense government by all the people, according to the American policy and under the American constitution."

The president asserted that the right of the wage earners to organize, bargain collectively and negotiate through its own agents had been determined.

Referring obviously to the railroad labor board, he said that "we have been making an interesting experiment in relation to railroad labor," and expressed the opinion that "it could probably be modified, through mutual agreement, to the benefit of all concerned."

In private employment, he continued, the right to strike goes along with the right to organize. Likewise, he said, the principles of voluntary arbitration is recognized, "but compulsory arbitration, to my mind, has to be reconciled with the right of individual freedom."

Restriction of immigration and enactment of tariff laws are necessary to preserve American standards for wage earners, the president added, declaring that the present administration had sponsored such legislation. Government legislation, he said, also is necessary for the establishment of peaceful conditions which will permit of protection at a minimum cost, but by an "adequate army and navy."

Instead of permitting the period of deflation which followed the war to be used "to secure a reduction in wages and the dissolution of labor organizations," he sad, the administration adopted a policy of "healthfulness to business, industry and labor." "The federal reserve system," he related, "has constantly reduced discount rates, business has revived and the millions who were without employment have found plenty of work at increasing wages."

HERE AND THERE

According to the receivers' report of the Elk Hills(Cali.) naval reserve lease, which the government is seeking to recover from E. L. Doheny, the property earned $15,900,000 in July, through oil and gas wells.

Forty forest fires are raging in northern Arizona.

Fifteen workmen were killed in an explosion of 14 tons of dynamite on a railroad construction job near Buenos Ayres, Argentina.

More than 7,000,000 new voters will assume the duties of citizenship for the first time this fall, according to announcement by Mrs. Alvin T. Hert, vice chairman of the Republican national committee.

CLEM L. SHAVER

Chairman of the Democratic National Committee.

Ohio Boy Slain.

Topeka, Kan., Sept. 2.—Harry Willis, 19, has confessed to police at Great Bend, Kan., that he hurled the unconscious body of Harold Watson of Circleville, O., before a speeding passenger train after the youths had quarreled and fought over $6 which Willis claims was stolen from him by Watson while they slept. The boys had been working for a threshing crew. Authorities said Willis confessed he served two terms in the Ohio reformatory for larceny.

Mrs. Georgia Hamon Rohrer, widow of the late Jake L. Hamon, was granted a divorce at Ardmore, Okla., from William L. Rohrer, Chicago art collector.

CONGRATULATED BY COOLIDGE

Yankee Fliers Complete Dangerous Leg of Trip.

TO MOVE DOWN ATLANTIC COAST

Westward Journey Will Start at National Capital and the First Stop Will Be Made at Dayton, Ohio—Little Difficulty Anticipated on Remainder of the Trip—President's Message.

Washington, Sept. 2.—The American around-the-world fliers who landed Sunday in Labrador after a 572 mile jump across the North Atlantic from Greenland, have received a message of congratulation from Presiden Coolidge.

The message was handed to Lieutenant Lowell H. Smith, commander of the flight. It read: "Your return to North American soil following circumnavigation of the earth by air, is an inspiration to the whole world. Your countrymen are proud of you. Your branch of the service realizes the honor you have won for it. My congratulations and heartiest good wishes go to you."

Little difficulty is anticipated in the remainder of the fliers' jaunt back to Santa Monica, Cal., which they left last March on their westward journey around the world. After a stop in Nova Scotia the aviators will hop off for Boston, thence down the Atlantic coast to Washington, where the journey westward will begin. The first stop on the westward flight will be at Dayton Ohio.

The airmen flew from Ivigtut, Greenland, to the lonely harbor on the Labrador coast in six hours and 49 minutes, making the journey over the dangerous air current of Davis Strait without mishap. It was one of the most dangerous legs of the voyage and there was great relief as the two big planes, piloted by Lieutenants Eric Nelson and Lowell Smith, settled on the water near the two buoys which had been prepared for them in Icy Tickle harbor.

It was just five months and 14 days from the date of their departure from Santa Monica when the airmen reached North America again. Four American army pilots took off from Santa Monica, Cal., last March 17. Major Frederick L. Martin, Lieutenants Leigh Wade, Eric Nelson and Lowell Smith each commanded a plane at the start.

The flight took the airmen up the Pacific coast to Alaska, where Major Martin wrecked his plane and was forced out. Wade, Nelson and Smith continued across the Pacific to Japan, down the China sea to India, across the deserts of Arabia and the Holy Land to Europe. From Paris the three flew across the English channel into the northland across England and Scotland to the Orkney islands.

Shortly after the take-off to Iceland, Wade's plane fell in the icy seas. An attempt to salvage it failed. He and his mechanic were picked up and plan to rejoin Nelson and Smith at Ice Tickle inlet, Labrador, for the remainder of the trip. Wade gets a new plane.

DISARMAMENT PROPOSITIONS UP

League of Nations Assembly Meets at Geneva.

Geneva, Sept. 2.—The league of nations assembly met in regular annual session here, with Paul Hymans of Belgium presiding at the opening meeting. The Americans present were Senator McKinley of Illinois and Representative Burton of Ohio.

Hymans delivered the opening address, reviewing the work of the league during 1924, including the opening of the court of international justice at The Hague, the sessions of the league council on the questions of limitation of armaments, the opium traffic and the trade in white slaves. The league has settled half a dozen dangerous European disputes, he pointed out, and its commission on intellectual co-operation has started work, with the Argentine republic participating.

A special committee of the league has been at work on disarmament proposals. They will be coupled with

PRINCESS OBOLENSKY

Daughter of Lady Ribblesdale and Late John Jacob Astor.

Premier Herriot's proposal that a general security agreement be drawn up and signed to protect nations against aggression by more powerful neighbors. A group of Americans, headed by General Tasker Bliss, former chief of staff of the United State army, brought a disarmament treaty to Geneva to be submitted to the league. The American government is not responsible for this treaty or any part of it.

DOINS IN OHIO

Overcome by Black Damp.

New Lexington, O., Sept. 2.—Two boys had a narrow escape from death by black damp in an abandoned coal mine on the Clouse farm, near Junction City. Rescue parties found the boys. Eugene Groves and Eugene Clouse, unconscious in the inner recesses of the mine when they were reported missing from their homes. They had been in the mine all day, but will recover.

Water Supply Low.

Marysville, O., Sept. 2.—This city's water supply is low, due to the heavy demand on the wells of the local water company. One of the large wells has been giving forth so much sand that the company has been forced to discontinue its use. All citizens have been asked to conserve water as much as possible.

Dairymen Meet.

Bucyrus, O., Sept. 2.—Judge William Klinger of Lima, president of the Lima Creamery association, and E. D. Wade of the dairy department of the Ohio Farm bureau, were the principal speakers at the County Dairy association picnic held near this city today.

Veterans Elect Cole.

Findlay, O., Sept. 2.—Colonel Ralph D. Cole of this city was elected president and Captain J. Edwards of Cincinnati secretary-treasurer at the close of the 37th division's annual reunion. Cincinnati will entertain the division next year.

Foreclosure Suit Filed.

Elyria, O., Sept. 2.—The Elyria Savings and Trust company filed foreclosure suit for $59,360 against the American Shovel company, Lorain, claiming unpaid principal and interest on a mortgage.

MERGER PROPOSED

West Ohio Methodist Conference Opens at Ada, Ohio, Today.

Ada, O., Sept. 2.—Four hundred ministers and 1,000 lay delegates are attending the West Ohio conference of the Methodist Episcopal church, which opened here today. Most of the delegates are quartered in Ada homes.

Memorial services will be held tomorrow morning. In the afternoon the annual meeting of the Preachers' Relief society and of the Retired Ministers' association will be held. Thursday's sessions will be a discussion of the merger of the West Ohio and Ohio conferences and an address by Bishop Theodore S. Henderson, presiding bishop of the Cincinnati area. Friday will be given over to the laymen's conference. Saturday the anniversaries of the Women's Foreign and Women's Home Missionary Societies will be celebrated. Saturday night a grand temperance rally will be held.

Eighth Victim Dead.

Toledo, Sept. 2.—Cyrus Updegra Jr., 9, member of the automobile party which was struck by a train at grade crossing at Perrysburg, died at the East Side hospital.

RAIL LABOR BOARD HIT BY DAVIS

Democratic Nominee for "More Flexible Machinery."

MAKES SPEECH AT WHEELING

Declares Himself In Favor of Child Labor Amendment, Against Proposals to Curb Power of Courts and Against Use of Injunction In Labor Disputes—Proposes Substitute For Rail Labor Board.

Wheeling, W. Va., Sept. 2.—In his Labor day address here John W. Davis, Democratic nominee for president, favored abolition of the railroad labor board in its present form. As a substitute he said he would set up "more flexible machinery under government direction" for the handling of railroad labor disputes.

Mr. Davis, addressing members of the Ohio Valley Trades and Labor assembly, declared that because of the widespread effect industrial disputes have upon commerce and industry, it is the duty of the government to lend its aid and encouragement in every possible way to their settlement. He expressed the view that in setting up machinery through which there could be "fair and calm discussion" of the subjects at issue with "thoroughgoing publicity," there were two fundamentals, first that the boards be composed of representatives of the employers and of the particular crafts concerned (this would leave out public representation such as there now is on the railroad labor board), and second, that such boards, instead of being fixed in their positions, should be filled by appointments made from time to time as the controversies arise.

The speaker added that whether legal machinery exists to compel the submission of labor disputes to such a board or whether its decisions could be enforced were of minor importance if the board itself enjoyed the confidence of the parties to the dispute, and if it realized that its chief function was to encourage a spirit of co-operation and friendship between employer and employe.

Mr. Davis declared himself in favor of the child labor amendment, against the proposed federal department of education, against proposals to curb the power of the court to protect the weak against unwise and unjust laws, and against the use of injunction in labor disputes.

In conclusion he urged the laboring men and women of America to lead their countrymen in a movement to have "America take her rightful place in the councils of humanity" and to see "that she becomes the first among the nations in the service of mankind."

SENDS OUT QUESTIONNAIRE

Hoover Would Reduce Number of Traffic Accidents.

Washington, Sept. 2.—The national conference on street and highway safety, working under the direction of Secretary of Commerce Hoover, has sent out questionnaires to several hundred communities in an effort to get statistics that will serve as a guide toward reduction of auto accidents. In most cases, police departments will gather the information.

The reports will show the age, color, sex and business of violators, whether they can read traffic signs in English, whether they own real estate or other property and whether they carry insurance on their machines. Another line of questions will ask how much driving experience the violator has had, whether he drives his own machine and whether it was bought new or second-hand, together with its age. The conference will attempt to analyze the reports and draw therefrom definite recommendations for remedial measures

Killed by Policeman.

Wilmington, O., Sept. 2.—In a gun duel with Policeman Leroy Thomas here, John W. England, 49, of Columbus, was shot and killed after he had shot and wounded his divorced wife, Mrs. Clyde England of this city. It is said he had been jealous of attentions paid his former wife by other suitors. The woman will recover.

Colored photographs have been transmitted by wire from Chicago to New York the American Telephone and Telegraph company announced.

An explosion in a grain elevator at Louisville caused damage estimated at $250,000 and spilled about 50,000 bushels of wheat.

RESULT OF KLAN FUSS

Two Men Killed and a Third Wounded In Pistol Battle.

Buffalo, Sept. 2.—Thomas H. Austin, 25, of Washington, and Edward C. Obertean, 43, of Buffalo, were killed, and George C. Bryant of this city wounded, in a revolver battle here. The fight started when two automobiles carrying five men drew into Durham avenue and stopped. "Let's have it out," was the only remark reported by an eyewitness. All began shooting. After the smoke had cleared two men were found dead in the street.

The affair is said by police to have been the result of a Klu Klux Klan quarrel. Bryant last year joined a small bunch of klan leaders in filing with the secretary of state at Albany a statewide certificate of incorporation for the klan, designed, it was charged, to offset the effect of the Walker law, passed by the 1923 legislature, which had for its purpose the outlawing of the klan in this state. Obertean worked up to a few months ago as a special deputy for Lieutenant Austin Roche, who has been investigating klan activities here at the direction of the mayor.

Internal Revenue Collections.

Washington, Sept. 2.—A preliminary report by Commissioner D. H. Blair of the bureau of internal revenue showed that the total collections of internal revenue from all sources for 1924 were $2,796,179,255.06, compared with $2,621,745,225.57 for 1923, representing an increase of $174,434,029.49. The collections from income and profits taxes were $1,841,759,316.80 for 1924, compared with $1,601,089,534.54 for 1923, an increase of $150,669,782.24. This is the first year since 1920 in which income tax collections have shown an increase over the year previous.

MOTIVE MADE KNOWN

Two Girls Admit Choking Chicago Woman to Death.

Chicago, Sept. 2.—Lucille Marshall, with her companion, Anna Valanis, confessed choking Mrs. Bessie Gaensslen to death in her apartment with a telephone cord. Lucille said concerning the motive of the crime: "She taught us the game; then she kept the money we made. But we didn't really mean to kill her. We wanted to get back our money."

The two girls, both in their teens, admitted they enlisted the aid of two boys, William Lydon, 16, and Tony Valanis, Anna's 19-year-old brother, to enter Mrs. Gaensslen's apartment and steal the money they knew was there.

"Mrs. Gaensslen showed us how to make money," Lucille said through tears. "She introduced us to lots of men. We kept our promises, but we never got a penny. She kept all the money herself. And so we decided to get it anyway."

The boys, when arrested, readily confessed their part in the murder, but insisted they acted on orders of the two girls.

Woman Takes Poison.

Newark, O., Sept. 2.—Mrs. Mildred Lorenthe, 27, swallowed poison at her home here and died within 15 minutes. She recently was divorced. Her parents say she gave no indication of her intention prior to taking the poison.

MARKET QUOTATIONS

CHICAGO, Sept. 2.

Cattle—Top steers, $10 85; bulk of sales, $8@10 50, stockers and feeders, $4 50@7 60; calves, $12 50@14.

Farm Labor Is More Effective

Workers Have Decreased While Mass of Crop Production Shows Increase.

(Prepared by the United States Department of Agriculture.)

Farm labor became about 18 per cent more effective in crop production during the last decade, says the United States Department of Agriculture. Although the number of farm workers decreased over 4 per cent in that period, the mass of crop production increased about 13 per cent. The increased efficiency is attributed chiefly to the use of more and better machinery, the time saved by the use of automobiles, and to the fact that farm owners and their families are working harder or longer on account of farm labor shortage and high wages.

The average crop area per worker in 1920 was 29.4 acres, compared with 25.2 in 1910, an increase of nearly 17 per cent. The average size of farms has also increased, being 148 in 1920 compared with 138 acres in 1910. Grain and hay crops, which are especially machine-produced, show a higher rate of increase in acreage from the average of 1907-13 to that of 1917-23 than other crops, it is pointed out. The acreage of all crops increased about 12 per cent, whereas that of grains and hay increased about 14 per cent.

Better Machines Used.

More and better machines are being used since 1910, the department says. Two-bottom sulky plows, for example, have in many cases replaced walking plows, and two-row cultivators are being used instead of one-row cultivators. So long as land is more plentiful than labor, high production per worker is the economic objective instead of high production per acre, the department points out. Hence, farmers are displacing human labor with machinery.

The automobile, which made possible a saving in human time, was one of the great gifts to the farmer during the decade, the department says. In 1920 the census found that 1,979,564 farms in the United States had 2,146,362 automobiles. These farms comprised nearly 31 per cent of all farms, but in some sections of the country the percentage of automobile-owning farms was as high as 58 per cent. Approximately 75 per cent of the use of automobiles on farms is for business purposes, the department has found.

There has also been a substitution of animal power for human power during the decade, as indicated by the increased ratio of horses and mules to agricultural workers. In 1910 there were 1.94 horses and mules per agricultural worker, and in 1920 the average was 2.13, showing an increase of 11 per cent.

The ratio of crop acreage to number of horses and mules has also increased, being 13.8 acres in 1920, as compared with 12.9 acres in 1910.

Motor trucks on farms at the time of the 1920 census were much less numerous than automobiles and slightly less than tractors. There were 139,169 motor trucks on 131,551 farms. Nearly 5 per cent of the farms in the Middle Atlantic states had motor trucks. These time-savers have given the farmer in a large degree another pair of hands, the department says. They have not increased his leisure time, but have multiplied the effectiveness of his labor.

Efficiency Not Diminished.

It seems probable that the efficiency of farm labor at the end of the decade 1910-20 has not diminished in the three subsequent years, the department says. A net loss of 460,000 persons, allowing for births and deaths, of the agricultural population during 1922 was estimated by the department. This figure includes men, women and children which would make the man labor loss around 175,000 men. No estimate for 1923 has been made, but it is thought probable that there was a continued reduction of the agricultural population, particularly as there was great industrial activity last year and farmers were at a continued economic disadvantage in the purchasing power of their products.

There is reason to suppose, the department says, that crop production last year, which was average, and a smaller number of persons with agricultural occupations combined to indicate an increased efficiency of farm labor a little above the 18 per cent of 1917-23 over 1907-13, especially since the aids to that labor have in some respects increased since 1920.

Inspected Products Are Favored in Liverpool

Foreign markets are tending to favor American products that have been officially inspected at shipping points, according to advices received by the United States Department of Agriculture.

Sales of American apples in Liverpool are made by samples, and buyers declare they have found that the federal-state inspected apples can be relied upon to be of uniform quality and condition, and that the samples can be depended upon to be indicative of the quality and condition of the entire shipments.

Liverpool buyers state that in many instances the quality of fruit in non-inspected shipments has a wide range, and that purchasers by samples of such shipments are always subject to discount on account of the element of uncertainty.

Thrifty Wife Sells Shoe

Shortly after a traveling man returned from a long road trip he went to his closet to get out his light summer suit and white shoes. He could find but one shoe. He asked his wife about the missing shoe, but got no information. Inquiring further, he learned from his daughter that the wife had sold one of the shoes to a one-legged man who had called at the door.—Kansas City Star.

Legend of the Wagtail

Here is a pretty Portuguese legend of the wagtail: "When the Virgin fled into Egypt with the infant Christ, a wagtail followed, obliterating the trail by brushing away with its tail the donkey's footprints. Our Lady therefore blessed it, giving it the power to kill the hawk by attacking it under the wing."

High English Cliffs

Beachy head is one of the highest of the English cliffs. Its summit is 564 feet above the sea. The Welsh coast has several cliffs higher than Beachy head. Holyhead is 719 feet and Great Orme's head 678 feet. St. Catherine's cliff, Isle of Wight, beats all these. It is 830 feet high.

Blackberries in America

Some variety or other of blackberry is cultivated in all parts of the United States except in southern Florida, part of Wisconsin, Minnesota, North and South Dakota, Wyoming, Colorado, Montana and sections of the western states where hot, dry winds destroy the ripening fruits.

Now is the time to subscribe for the Union-Herald. **We give $16 in Aer-O-Plane Bonds for each $1 paid on subscriptions to either Daily or Weekly.**

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it dosen't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simyly because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

No. 1. Circulation of cold dry air.
No. 2. Effective Insulation.
No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

FOR THOSE WHO WISH TO TEACH

Questions Put to Applicants For County Certificates.

EXAMINATIONS HELD AUG. 29

Prepared by the State Superintendent of Public Instruction to Test the Mental Qualifications of Those Who Seek Positions as Teachers in the Public Schools.

Following is the list of questions as prepared under direction of the state superintendent of public instruction and submitted at the county examinations for teachers Aug. 29 for elementary school certificates:

HIGH SCHOOL AGRICULTURE.

(Choose 10)

1. Discuss the relative importance of agriculture in this country.
2. How deep should land be drained? Why?
3. How may hog cholera be prevented? How may an outbreak be controlled?
4. What is the purpose and value of a hotbed?
5. Name and describe common impurities of clover seed. What are the disadvantages in sownig impure seed?
6. Name three or four Ohio cities famous for the manufacture of agricultural implements. Specify in each instance.
7. What features are necessary for a good orchard location?
8. What skills should the normal farmer boy have acquired by the age of sixteen? The ordinary farmer girl of the same age?
9. Give the argument in favor of a silo on the farm.
10. What is a mulch? Kinds? Purpose of each?
11. Discuss crop rotation and its relation to profits.
12. State the relative economy of selling crops or feeding them. What are the limitations of each?

PRINCIPLES OF TEACHING.

FOR APPLICANTS WITHOUT EXPERIENCE

(Choose Eight)

1. Discuss the value of the teacher's personality on the educational development of the child.
2. Discuss the place of physical exercises in school, touching on the amount and character of such exercises. State reasons for giving these exercises.
3. State definitely what qualities of character you would aim to develop in pupils by means of the recitation.
4. Name and discuss briefly the elements of governing power in the teacher that are essential for success in controlling and guiding pupils.
5. Mention five rules or principles applying to the art of questioning and give an illustration of each.
6. Briefly explain apperception, and show the important part it plays in the process of teaching.
7. Show how attention may be strengthened in children.
8. What accounts for the retention of a remembered fact?
9. Why is it difficult to form or change a habit?

FOR EXPERIENCED TEACHERS

1 Name three O. T. R. C. Books which you read from the 1923-24 list?
2. Explain how to make a suitable lesson plan. What are three advantages in using lesson plans?
3. Explain your methods of keeping the various school records.
4. What is gained by conditioning a pupil in one or more branches of study? What are the disadvantages usually incurred?
5. Name the O. T. R. C. Books for the year 1924-25.
6. Give in outline form, arguments for and against home study in the upper grades. What are your conclusions?
7. Make a daily program. What are the legal requirements for teaching physical training in the elementary schools of Ohio?
8. Distinguish between inductive and deductive methods of teaching.
9. Mention the most important benefits to be derived from the use of standard tests. Name five authors of such tests.
10. What school papers or magazines do you read regularly? What other means of professional growth have you taken advantage of this summer?

HISTORY.

(Choose Eight)

1. Name three Colonial governors and state an important event in the administration of each.
2. Relate specifically how a teacher may supplement the text to intensify her pupils' interest in the study of history.
3. How did the United States acquire Texas?
4. Write briefly upon one of the following topics: The Monroe Doctrine; The Missouri Compromise; The Emancipation Proclamation.
5. What seems to be the big question for the discussion of statesmen and politicians in the United States today? Tell something of the views held.
6. Show how the commercial needs of Europe led to the discovery of America.
7. Compare Clay, Calhoun and Webster as statesmen, telling what each advocated particularly.
8. Tell of five of the most important American inventors and their inventions.
9. Tell for what each of these men is noted: Dewey, Custer, Andre, Lafayette, Nathan Hale, Hancock, Greele, Boone, Peary, Grant.

AGRICULTURE.

(Choose Eight)

1. In what way or ways may the teacher induce boys and girls to remain on the farm?
2. Define soil, subsoil, hardpan, clay.
3. What are some of the things to be considered in selecting seed potatoes?
4. Name five forage crops. What forage crop is grown most extensively in your community? What is the reason for this?
5. Describe the proper cultivation for an apple orchard.
6. Tell the life history of the codling moth, the damage it does, and the effective method of combating it.
7. State four rules for the feeding of farm animals.
8. Where do plants get their food and how does it reach the points in the plants where it is needed?
9. State four important rules you should observe in transplanting an apple tree.

ARITHMETIC.

(Choose 10)

1. Do you teach the multiplication tables as memory exercises? Explain in detail your method of teaching multiplication and justify it.
2. Write a list of five problems that you use to develop reasoning in any grade below the fifth. The problems must cover five phases of the work.
3. What helps have you in teaching number work? Explain the way you use these devices in presenting number work to pupils.
4. What disadvantages are there in having large classes in number work? Are your pupils required to have their lessons prepared before recitation?
5. Show, by several illustrations, how you present fractions to your pupils. Make your own problems and explain them.
6. A company engages a supper. Being joined by ⅗ as many more the bill of each is 50c less; what would each have paid if none had joined them?
7. If I gain ¼ ct. apiece by selling eggs at 37c a dozen, how much apiece will I gain by selling them at 43 cts. a dozen?
8. If I pay $1000 for a 5 yr. lease and $200 for repairs, how much rent payable quarterly is that equal to, allowing 10% interest payable quarterly?
9. Find cost of fencing a square field containing 40 acres at $1.25 a rod.
10. A sold a suit of clothes marked $50 at 10% off for cash, making a profit of 20%. Find cost of suit.
11. Show which is the better investment, Victory bonds 4¼ at 98 or 5% stock at par.
12. Find cost of 100 boards 16 ft. long, 8 inches wide and 1½ inches thick at $50 per M.

GEOGRAPHY.

(Answer ten)

1. Briefly outline a plan for a week's work, showing how a fourth grade class might be taught world geography, by tracing certain necessities through their respective courses.
2. Show how you would conduct an imaginary trip from Ohio to Alaska and point out some benefits to be derived from such a trip.
3. Speak of the advantage of team work in the sixth and seventh grades and offer some suggestions for its development.
4. Name one, or more, important wheat districts in each of the continents of the world.
5. How would you account for the extreme fertility of the valley of the Red River of the North?
6. Why is the Niger River of less importance than the Nile; and why is the Amazon of less commercial importance than the St. Lawrence?
7. What needs may be met in Mexico and what, in the United States, by a mutual interchange of products, or of service?
8. What and where are the following: Nova Scotia, Calcutta, Good Hope, St Elias, Moscow, Bagdad?
9. Name some three or four of the most significant changes in the geography of the world as a result of the recent World War.
10. Name three exceptions to the general rule that the farther from the equator one goes the lower the temperature.
11. New Orleans and St. Louis are in the same longitude and are in 30 and 39 degrees, respectively, north latitude. About how far apart are they in miles?
12. If the earth's axis were inclined 15 degrees instead of 23½ degrees, how wide would be the north temperate zone?

LITERATURE.

1. Quote from five American poets of prominence.
2. What literary qualities in Poe's poems display his genius?
3. Who wrote "Last of the Mohicans"?
4. (a) Name three American women who have contributed to our literature. (b) Give one theme presented by each.
5. Which do you enjoy the better: prose or poetry? (a) Name one prose production and one in poetry you enjoy. (b) Why do you enjoy them?
6. What effect are the "movies" having upon the literary taste?
7. Name three specimens of the following types of literature: Animal Story, Fable, Fairy Story, Myth, Hero Story.
8. Tell briefly of the life and writing of Indiana's greatest poet.
9. Discuss Ohio's importance as a literary State. Name four of her most noted literary men.
10. Who was the author of the "Star Spangled Banner"? State the conditions under which it was written.

GRAMMAR.

1. Classify sentences according to form and meaning. Illustrate.
2. Name and define the eight parts of speech.
3. Write the plurals of the following words: baby, wolf, man, speed, son-in-law, child, fish, turkey, potato, and goose.
4. Give the parts of the following verbs: lie, sit, lay, set, forsake, forget and write.
5. Distinguish between the active and the passive voice. Give a sentence illustrating each.
6. Conjugate the verb write in the active voice, indicative mode and future tense.
7. Write sentences illustrating the use of the noun clause, the adjective clause and the adverb clause.
8. Decline: he, I, she and you.
9. Compare: good, northern, far, slowly and ill.
10. Name the parts of speech in the following: I quarrel not with destiny, but make the best of everything—the best is good enough for me.—Riley.

PHYSIOLOGY.

1. Describe the process of changing food to energy in the human system.
2. Give the symptoms and describe the effects of adenoids. How should this ill be remedied?
3. Locate and state the functions of the liver; the kidneys; the vena cava.
4. State three important rules about eating and explain why each should be observed.
5. State definitely what hygienic conditions should prevail in a model schoolroom.

Development of Cancer.

What makes your finger stop growing when it reaches the length of due proportion to the hand and body? When you cut your finger or skin your shin why does the healing process stop when new flesh sufficient to replace that which was destroyed by the wound has developed? Cancer is simply a violation of the mysterious force which governs normal growth—a group of cells embarked upon a wild and lawless career of growth—says the medical authorities, and this ungovernable growing process is caused by constant irritation.

AT THE COURT HOUSE

Sues For Divorce.

Alma Hoffman has filed a suit for divorce against Lloyd Hoffman in the court of common pleas. She asks for alimony and the custody of the children. The parties were married in this city June 14, 1912. She charges gross negect and extreme cruelty. I. F. Snyder represents the plaintiff.

AUTOS COLLIDE.

Two Fords ran into each other Sunday evening at the corner of Court and Main streets. The machines were owned by Tom Thomas of this city, and J. E. Allspaugh, of Amanda. A flat tire and bent fenders were the only damages.

Monday morning at the same place a Studebaker driven by Mrs. William Wean, of Ashville, kicked Lemuel Dumm's Ford bumper off getting across the street.

His View of It.

"We'd all be fine people," said Uncle Eben, "if all de growed-up folks was as truthful, kind an' polite as dey expects de chillun to be."—Washington Star.

Mrs. Noah Weaver has returned home from an extended visit to her son, Mr. Fred Weaver at Willow Grove park, Philadelphia, Pennsylvania, where Sousa's band has an engagement; Mrs. Weaver also visited Atlantic City, New Jersey.

Judge and Mrs. Isaac N. Abernethy and the latter's sister, Mrs. Minnie, wife of Rev. Joseph Sitler, of Lancaster, returned Friday afternoon from a two weeks' motor trip to Toronto and other points of interest in Canada and at Niagara Falls, Washington D. C., New York and Atlantic City.

CHRYSLER CAR

Made New Record in Ascent of Mount Wilson Recently.

Mount Wilson—a California peak, not far from Los Angeles and known to Pacific coast motorists as a hard and dangerous pull for any motor car—recently surrendered before a strictly stock Chrysler Six touring car piloted by Ralph De Palma, world-famous racing driver, in the record time of 25 minutes and 48.85 seconds, says the report received by the Leach Motor Sales company.

The ascent was made over Mount Wilson toll road, a narrow, winding trail with a rise of more than 4600 feet in the nine and a half miles of roadway from the toll gate to toll gate. The run was particularly remarkable in view of the fact that the car was not stripped, but carried all fenders and was minus only the top half of the windshield. Even the muffler was not removed and no cutout was used.

ATTACKS MONOPOLY

Senator La Follette Broadcasts Labor Day Message.

Washington, Sept. 2.—Senator La Follette of Wisconsin, in a Labor day message, appealed to the voters of the nation to support his independent candidacy for president.

He attacked the Republican and Democratic parties, which, he declared, offer nothing to remedy "the evils which have arisen under their respective administrations and as a result of their policies." He said he had entered the campaign as a candidate to "convict the monopoly system which," he contended, is "protected by certain laws and by the failure to enforce others, and whose power is so great that both of the old parties have become its abject slaves."

Senator La Follette pledged himself, if elected, to work for the repeal of the transportation act of 1920, behind which, he charged, the interstate commerce commission, "has taken refuge in its refusal to reduce the present exorbitant railroad rates."

WARNS PEDESTRIANS

Boulay Says They Should Use the Left Side of Highways.

Columbus, Sept. 2.—L. A. Boulay, director of highways, urged that pedestrians forced to use highways should always walk on the left side of the road, and thus face the approaching traffic. Boulay called attention to the fatal accidents that have occurred where pedestrians walked with their back to the line of traffic. Autoists can not always be depended upon to use best judgment in any emergency, he said, and also pointed out that sometimes there are conditions that prevent an auto driver from turning out around a pedestrian when, at the last moment, a machine is discovered from the other direction. "The danger is still greater at night because few drivers expect to see a foot traveler and his lights may not throw sufficient light for him to quickly discover the walker," the director said.

FARM HANDS WANTED

To Assist In Harvesting Big Crops In the Northwest.

St. Paul, Sept. 2.—Broadcasting an appeal for help, Great Northern railway officials declared that several thousand field workers are needed immediately to assist in harvesting bumper crops in the northwest.

Ralph Budd, president of the Great Northern, learning of the urgency of the situation, authorized rail officials here to aid farmers in informing the public of the need for workers. Farmers have announced that they would pay fares of harvest hands in addition to good wages, ranging upward from $4 a day with board. At least 10,000 men are needed in North Dakota, rail officials said, to assure prompt handling of the heavy grain crop.

New Vegetable Ivory.

A French scientist has discovered a new form of vegetable ivory, which can be used in European industry. This new substance is produced by the kernel of an edible fruit growing upon a palm of the upper Senegal-Niger territory. The kernel is seven or eight centimeters long and five centimeters broad, thus permitting the cutting of balls or plates of considerable size, to be used in marquetry or the making of dominoes, piano keys, buttons and so on. The kernel becomes extremely hard when dried. It is now being used as building stones for the making of houses of native chiefs.

Future Possibility

Waste power now tumbling over Victoria falls, Africa, may be running machinery in New York and Chicago when the present plans for power transmission without wires are perfected.

PUMPKIN SHOW MEETING.

You are requested to attend an open meeting of the Pumpkin Show at the mayor's office Thursday evening, September 4, 1924, at 8 o'clock p. m.

By order of the Board of Directors,
N. R. HUSTON, Sec't.

2septd3.

BENEVOLENT ASSOCIATION

Campaign for Needed Funds Will be Put on Wednesday and Thursday.

How Much Are You Interested in This Worthy Cause?—Let Your Subscription be the Answer Payments May be Made September and March First.

The C. B. A. has completed plans for a vigorous drive for funds on Wednesday and Thursday of this week. Each street has been placed in charge of an active worker in the society and she in turn may ask others to help. The association is about out of money which means that every person in our city ought to contribute his or her mite to maintain such a splendid work. This organization is carried forward by a few faithful men and women, who give their time and energy, because they are interested in the public health of our community.

Every person, according to the society's institution who pays one dollar per year is a member, and to show their interest in the work should come to the monthly meeting held the first Tuesday of each month at the City Cottage. Notice is always given in our daily papers and every one who wishes to be an active member is always welcome.

Miss Phelps reports that she has not had one sick baby this summer. What does that mean to this community? Twelve years ago when she came here and for several summers she was called to care for at least 25 babies, who were sick from improper feeding during each year until this year she has had none.

It takes more than $2000 to maintain this organization for one year; surely every good citizen realizes what a splended investment this is in public health. The nurse's salary is $115, the office supplies and clerk, with the supplies necessary for the work takes the money.

For two years half of the milk for the school children has been donated, the association paying the other half. Milk is supplied to families where there is sickness; just now a family with two cases of tuberculosis is being cared for.

What will be your answer to this appeal for funds to carry on this work? Stay at home until the solicitor comes and then be ready to give her your attention, if only a small amount. If every person could give at least one dollar it would be easily cared for. A larger sum is very much needed, and if you feel you can, give more. We shall be glad to take your subscription payable twice a year, first of September and first of March.

Measurement by Light Rays.

The most delicate measuring possible, accurate within millionth of an inch, is done by means of light rays

DWELLING TO BE SOLD IN PARTITION.

SEVERED ARTERY

Mrs. O. D. Gerhardt, of Cleveland, Hurt in Auto Wreck.

A treacherous steering wheel, refusing to work, while coming down a grade on the Williamsport pike Sunday afternoon caused a car in which Mr. and Mrs. O. D. Gerhardt, of Cleveland, were riding to go into a ditch. Mrs. Gerhardt was severely injured when she was thrown up and against the windshield. The broken glass lacerated and cut a gash three inches long in her right arm, severing an artery, from which she bled profusely before medical aid was rendered. She was taken to the office of Dr. D. V. Courtright where her wounds were dressed and later taken to Mt. Carmel hospital Columbus, in Albaugh's ambulance where she will be given treatment before returning home. Mr. Gerhardt escaped injury.

AMUSEMENTS

Pola Negri in a sympathetic role in a picture with a happy ending. So we find the screen's foremost emotional actress in the Herbert Brenon Paramount production of "Shadows of Paris," which opened at the Metropolitan theater last night. Adolphe Monjou, Charles de Roche and Huntly Gordon are featured in principal roles.

Miss Negri, as Claire, is an Apache in love with Fernand, who goes to war and is reported killed. Raoul a statesman meets Claire and falls in love with her. She conceals her Apache traits, posing as a Polish widow. She marries Raoul but frequently returns to her Apache haunts and helps her friends to secure further booty from her rich friends in the upper closses. On one of these visits, she is amazed to see Fernand—alive. Her former passion for him is renewed and she tells him where she lives.

In the meantime, Raoul plans a police raid in the underworld in the hope that he may capture the leaders of the Apaches, who are responsible for a series of crimes. While Claire is in the Apache den the police, headed by her husband, arrive. She escapes and that night Fernand comes to her house. At the sight of her jewels his thievish instinct overcomes his love for the girl. He endeavors to steal them and she undergoes a change of heart and realizes that she does not love her husband. Fernand is shot and in the subsequent alarm Claire and Raoul are finally united as they never were before.

Each succeeding Negri picture goes its predecessor one better, but "Shadows of Paris goes "The Spanish Dancer" two better—in other words, it's far superior to anything the continental star has ever previously attempted.

Misses Minnie and Elizabeth Elliott of Lafayette, Indiana, are guests of their aunts, Miss Emma and Kate Grand-Girard.

COBURN' MINSTRELS A REAL BIG TREAT.

Coburn's Minstrels, with many new black faced comedians, a fine band and orchestra and a show full of pep, song dance and novelties made a hit at the Maryland theater last night before a well filled house. The show will be repeated today and it is likely it will draw heavily due to the impression it made last night. In addition to straight out minstrelsy the show carries acts that would be classed high in vaudeville, giving a combination seldom offered with one organization—Cumberland Evening Times.

Distinct Advantage

There's an advantage in being obscure. Nobody snoops about to see what you are doing.—Detroit Free Press.

NOTICE, FOOTBALL PLAYERS.

The F. O. E. football team will hold its first meeting and practice Friday, September 5, at o'clock p. m. Eagles are out for state heavy weight championship and are ready to book games with high class teams. West Side A. C., Jungle Imps, Chillicothe and Portsmouth, take notice. All players desiring tryout report at F. O. E. hall on above date. 2septd1.

POLICE COURT.

Joseph Gleach was fined $100 and costs by Mayor Fitzpatrick in police court this morning for operating a motor vehicle while intoxicated Friday. The fine and costs were paid and he was discharged.

NOTICE.

Owing to the repairs now being made at the M. E. church, there will be no meeting of the W. H. M. society this month.

NOTICE.

A city teachers' examination will be held in the high school building on Friday, August 29, beginning at nine o'clock. All credentials for admission to the examination must be certified by the state department of education.

SCIENTISTS FIND NEW FIELD OF RESEARCH

Much Expected of Explorations in Sinai Peninsula.

The deciphering of the remnants of an ancient tablet found on the Sinai peninsula revives interest in an almost forgotten land of archeological research. The remnants of the tablet were found some time ago by Professor Flinders Petrie, the founder of the British school of archeology in Egypt and one of Great Britain's most distinguished Egyptologists, in the course of his explorations in southwestern Sinai.

They came later under the observation and study of Dr. Hubert Grimme, professor of Semitic languages at the University of Munster, who deciphered them and reported their discovery.

Doctor Grimme says the tablet was written in old Hebrew. He quotes this sentence which he deciphered, "I was taken out of the Nilus by the Egyptian queen" and says he found also the names of Joseph, Manassas and Moses. The statement that the stones were remnants of the original tablets bearing the Ten Commandments given to Moses was very probably not made by Doctor Grimme.

Doctor Grimme discovered in these remnants a part of the record of the exodus from the Nile valley. They were found in the supposed line of the wanderings of the Israelites after they had crossed the Red sea. He deplores the fact that only a portion of the tablet was found and that no effort was made to locate the remainder.

Shifting desert sand, intense heat and lack of water have been formidable obstacles to archeological exploration on Sinai peninsula. The country is rich in valuable antiquities; a French explorer found 3,200 inscriptions in Egyptian and Semitic among old temples and in quarries which were extensively worked from 2500 B. C. to 1500 B. C.

We know Sinai was the refuge of many Christian anchorites in the period of persecution in the Third century and that Emperor Justinian built the famous convent of Mount Sinai, afterward known as St. Catherine's, early in the Sixth century.

The convent of St. Catherine has yielded two most important Biblical manuscripts. The German student Tischendorf, in his research extending from 1843 to 1859, brought to light ancient Greek manuscripts known as the "Codex Sinaiticus," containing most of the Septuagint and all of the New Testament. Miss Smith Lewis in 1892 found a palimpsest Syriac text of St. Luke's gospel.

After those two discoveries Sinai was a neglected field of research until Professor Petrie's find of the old Hebrew tablet. The recent research work of Professor MacAlister, in which he succeeded in unearthing almost the whole of the ancient city of Jerusalem, has given a new impetus to exploration in Biblical lands. This may result in bringing to light the long hidden archeological treasures of Sinai peninsula.—New York Sun and Globe.

Mrs. Edison's Beliefs

"It is a woman's duty to stay at home and make that home attractive for some man so that he will be happy and better able to cope with his business."

This from Mrs. Thomas Alva Edison, wife of the famous inventor, who has carried her theory into practice by resigning her active duties in various clubs.

Mrs. Edison also opposes girls who prefer a business career to marriage declaring such a girl is making a "great mistake" and "giving up an awful lot for the sake of having her own money."

She is a staunch believer in a college education for girls despite her "old-fashioned ideas." She says a daughter should be sent to college in preference to a son and she needs a liberal education for her children while the boy can get his education in contact with life, as was the case with her noted husband.

To Study in Mexico

To gain first-hand knowledge of Mexican business methods, a group of students from Boston university and other colleges will go to Mexico City the coming summer to take courses in commercial subjects at the National University of Mexico. These students will work for Mexican business firms during the morning and early afternoons, and though they will receive no pay for this work they will receive college credit for the experience. The university lectures will be given in Spanish, but as a help to the English-speaking students an outline and a resume in English of each course will be supplied. The courses will be given by special arrangement between the National University of Mexico and Boston university, and the students will not have to pay any extra tuition fees.

Not Seeking Originality

"I can't say that your recent remarks have been very original."

"I didn't want 'em to be," answered Senator Sorghum. "There isn't anything novel or ingenious about the plain oldfashioned truth, and that's what the people are hankering for these days."

The Flow of Money

"You say that man could give information about who is getting the oil money?"

"He could tell where some of it goes," answered Miss Cayenne. "He's a Florida hotel clerk."

SUCCESSFUL AUCTION SALE

Big Crowd Attracted to Circleville Tire and Repair Co. Saturday.

Tapestry Fibre Rocker Brought $650 in Aer-O-Plane Bonds and Total Amount Realized Was $6386—Next Sale Announced Later.

The fifth Aer-O-Plane Auction sale was held last Saturday afternoon at the Circleville Tire & Repair company on East Main street and drew a good crowd. Lewis Dresbach was the auctioneer and R. L. Brehmer, Walter H. Nelson and John Galleher acted as clerks.

The articles were quickly auctioned off and competition among the bidders was keen. The amount received from the sale was $6,386 in Aer-O-Plane bonds.

The tapestry fibre rocker brought the highest price, $650. A pair of overalls was bid in for $6 and the bidder offered United States money in payment and it was refused. After it was explained that only Aer-O-Plane bonds could be accepted the overalls were again up put up at auction.

Charles E. Root Sr., local representative of the Pickerington Creamery company, donated five pounds of Mayflower creamery butter and the bidding for it was spirited, the five pounds bringing $50. This butter is on sale at the local groceries.

Following are the articles sold, the names of the buyers and the purchase price.

Tapestry Fibre Rocker, $650, Mrs. A. J. Lyle.

Three Victrola Records, $85, Mrs. J. C. Goeller, Jr.

One Dozen Cups, $5, A. C. Amspaugh.

One Pair Overalls, $5, Jennie Vawters.

One Pair of Pillows, $240, Marie Hurdle.

One Dozen Cups, $5, Raymond Reynolds.

Twenty-five Pounds Cane Sugar, $300, Inez Topolosky.

Velvet Rug, $220, Mrs. Wanda Wardell.

Kodak, $150, Mrs. Franklin Kibier.

Floor Mop, $110, Mrs. Charles Stone.

Hot Water Bottle, $100, Charles E. Roof.

Twenty-five Pounds Cane Sugar, $345, George Klingensmith.

One Pound Mayflower Creamery Butter, $6, Frank Gordon.

One Dozen Cups, $25, Robert Hitt.

Fancy Deck of Cards, $70, Charles Shepherd.

One Gallon Liglac Floor Varnish, $100, Mary Tolbert.

One Case of Coca-Cola, $40, Mrs. Hester Hulse.

Twenty-five Pounds Cane Sugar, $375, Mrs. Fred Newhouse.

One Pound Mayflower Creamery Butter, $5, Shirley Dowden.

One Dozen Cups $25, Charles Jewell

Four Spark Plugs, $140, William Betz.

One 30 by 3½ Tube, $160, Walter Eldredge.

One Running Board Mat, $165, Ralph Ward.

Luggage Carrier, $220, Mrs. Albert Knece.

Twenty-five Pounds Cane Sugar, $430, Mrs. John Mast.

One Pound Mayflower Creamery Butter, $22, Harry F. Alkire.

One String of Beads, $36, Hilda Thomas.

Men's Work Shoes, $210, Isaac E. Leffler.

Rag Rug, $150, Mrs. S. M. Beechey.

Men's Silk Hose, $140, Marie Dumm.

Three Victrola records, $30, Mrs. Lawrence J. Johnson.

Suit Cleaned and Pressed Order, $5, Elmer Reynolds.

Smoking Set, $45, Charles Leist.

Rear View Mirror, $85, Will H. Leist.

One Gallon Barn Paint, $120, J. F. Shell.

Easy Back Auto Cushion, $110, Mrs. George Miller.

Spot Light $380, Mrs. Julius Helwagen.

One Pound Mayflower Creamery Butter, $13, Paul Helwagen.

One Dozen Tin Cans, $30, P. D. Hinton.

Five Pounds Henn Brothers Coffee, $160, Spencer Tigue.

Half Dozen Boxes of Soap Flakes, $50, Talmer Wise.

Gators Rest Period

Hunting of alligators at night is prohibited in Mexico by an edict of the government.

SUDDEN DEATH

Harry Deffenbaugh, of Columbus, Succumbed to Heart Trouble Friday.

Harry Deffenbaugh, aged 53, of Columbus, a Hocking Valley engineer, died of heart disease Friday night at Laurelville where he had gone to attend the funeral of his brother, John, who had committed suicide by shooting himself.

Harry Deffenbaugh is survived by his widow, Maggie, three daughters; Mrs. Wayne Rittenhouse, Dayton; Mrs. Nell Snyder, 685 East Main street, and Miss Ruth Deffenbaugh, at home and a son, Claude, 1033 Parsons avenue. He was a member of the Brotherhood of Locomotive Engineers, Eagles. Burial in Union cemetery, the Knights of Pythias and the Coumbus.

FUNERAL OF LEWIS MURRAY

The funeral of the late Lewis Murray was held at his home on East High street Monday afternoon at 3 o'clock. Rev. G. J. Troutman of the Trinity Lutheran church officiated. Mrs. M. B. Trout sang, "Jesus, Savior Pilot Me" and "One Sweetly Solemn Thought" at the home and at the graveside, "Abide With Me."

Those who attended the funeral from a distance were; Mrs. Ellen Homrighous and daughter, Miss Letitia, of Royalton; Miss Alta Homrighous of Columbus, John Homrighous of Amanda, Mr. and Mrs. Frank Scott Dr. Chares Swope and family, Mr. and Mrs. William Swope, of Columbus, Frank Swope and sister, Miss Ollie Swope of Bloomingsburg.

WHO KNOWS HIM?

The Associated Press of April 30, carried the following item from Denver, Colorado; "Harry Willis, 19, confessed at Great Bend, Kansas, today that he killed Harold Watson, 19, early yesterday by throwing him in front of a speeding Missouri Pacific passenger train near Olmitz, Kansas, according to a special to the Rocky Mountain News. Willis is from Circleville, Ohio. Watson's home is in Denver."

Harry Willis, a resident of this city, was surprised when he was shown the news item last Sunday.

MOTOR TRIP.

Mrs. Bertha Doddroe and daughter, Miss Gladys, and son, Emil, and Alonzo Tannehill ,of Mt. Sterling; Mr. and Mrs. Jesse Huffer and son, Delno, of Orient, and Miss Elizabeth Dornsife of Circleville, have returned from a delightful motor trip to Cleveland, Niagara Falls, Buffalo and Canada. While in Buffalo they were guests of Mr. and Mrs. Harold Rapp.

THE NEW "OLD GLORY."

Seventy-three new flags floating frog flag staffs placed at the curb in this city in the business district, made a beautiful sight as they unfurled in the breeze on Labor day. The Ladies Auxiliary of the Veterans of the World war sponsored the idea.

Longest Dance.

William Kemp, aged seventeen, in the reign of Elizabeth danced from London to Norwich in nine days, the longest dance on record.

W. F. M. S.

The Methodist W. F. M. S., will meet on Thursday at 2 p. m., in the church auditorium. Use the front entrance. All mite boxes, dues and educational pledge money are to be brought on that afternoon.

2Septd2

FOR SALE.

On September 8, 1924, at 2 p. m., at the court house door, a business block consisting of a storeroom, a dwelling and apartment situated at the corner of Court and Ohio streets will be sold. This property was appraised at $4200. It is a good investment as it will net the owner ten per cent.

C. A. WELDON, Attorney.

29augd8w1.

HOUSES FOR SALE.

McKenzie property consisting of 6 room frame dwelling with soft water bath, good cement cellar, equipped with electric lights and gas; lot 67x165, brick street front and back, located on South Scioto street between Mound and Franklin streets. Possession given at once and the price is right if a deal is closed in a short time.

Phone 234.

PRISONER OF WAR.

Mr. and Mrs. C. E. Hunter and son-in-law and daughter, Mr. and Mrs. Frank L. Fruth and sons, Keith and John, left Freedom, Pennsylvania, Thursday evening at 8 o'clcok arriving at Wayne A. Hoover's in Jackson township at 7 o'clock Friday morning. They encountered much fog during the night. They expect to return soon after Labor day as Mr. Fruth is an inspector of locomotives in a Pennsylvania railroad shop. He is a World war veteran and was captured by Germans and held in a prison camp three months.

PRIZE WINNING HOGS.

Frank Schleich and son, William, are making quite a record with their Spotted Poland China hogs this year at the various fairs.

At the Ohio State fair they won 21 premiums as follows; Two firsts, five seconds, four thirds, three fourths, one seventh, three eights, one tenth, one Senior Championship and one Grand Championship.

At London the previous week they took 19 premiums as follows: Eleven firsts, six seconds and two Grand Champions.

CHEVROLET STOLEN.

Somebody borrowed Miss Anna Shea's Chevrolet roadster Monday evening and so far nothing has been heard from the car. It was taken from in front of her home where she usually parks.

JUST RECEIVED.

A good supply of Indiana watermelons.

John J. Mack
North Court Street.

Life of Steel Rail

A steel rail lasts, with average wear, about eighteen years.

Sick Poultry Can Be Cured Any Season of the Year.

Circleville, Ohio R. F. D. 1,
August 26, 1924.

Mr. Fickardt:—

I have raised chickens for many years but my experiences this year have been more trying than any previous season that I can recall. All spring I had been having trouble with my flock, both young and old, and during the month of July I lost about one hundred of my chickens, quite a number had limber neck.

About August 1, I was nearly frantic and did not know which way to turn. I ran across about this time a bottle of Fickardt's Roup and Cholera Drops and I can say that the results I obtained have fully justified your statements.

One case of limber neck was too sick to take the medicine as the other chickens did, but I gave it some with a medicine dropper thinking then that it was a waste of time, but the next morning it was still around and it finally got well. The rest of the flock have straightened out and they are doing well now.

Sincerely,
Mrs. Lucy Honnald.

Fickardt's Roup and Cholera Drops

Is a remedy for Roup, Colds, sneezing, Canker, Limber neck, Chickenpox White Diarrhoea, Indigestion and bowel complaints. Price 50 cents.

Sponges.

Fisheries experts and scientists have been unable to ascertain accurately how sponges feed. An ordinary sponge will grow from one to one and one-half inches or more a year. The portion of the sponge with which we are familiar is the skeleton or framework of the sea product as it exists in the briny deep. The slimy, gelatinous substances is decomposed by wind, weather and sunshine and subsequent soaking in sea water cures out any gelatinous materials which still adhere to the sponges.

First Immigration Law

The first United States immigration law was that enacted March 3, 1875, which prohibited the immigration of aliens who had been convicted of crimes.

Confederate Soldier Pensions.

Pensions for Confederate soldiers and their widows are provided by all 11 of the former Confederate states. These pensions are supported by a special tax on assessed property or taken out of general treasury funds. Pension administration is usually under direction of the state auditor or comptroller, though Tennessee, Louisiana, and Florida have state pension boards, and Georgia and Texas each have a pension commission. Through indirect taxation the people of these states also contribute to support the pensions paid by the federal government to former Union soldiers.

Swallows Favored Birds.

In Palestine the swallows are allowed the freedom not only of the houses and living rooms, but of the mosques and sacred tombs, where they build their nests and rear their young.

RESIDENCE AND STORE ROOM.

The Jacob Brown property, South Couht and Ohio streets, will be sold at sheriff's sale at the door of the court house, Monday, September 8, at one o'clock p. m.

28augd&wtf.

SHERIFF'S SALE IN PARTITION.

The farm of the late Thomas J. Beckett, comprising 118.93 acres of land, situated in Scioto Township, Pickaway County, Ohio, and adjoining the village of Commercial Point, and the Scioto Township Centralized Schools, will be offered at Sheriff's sale in the partition suit of Ruth H. Beckett versus James W. Beckett, et. al. No. 14,987 in Common Pleas Court, Pickaway County, Ohio, on Monday, September 8, 1924, at 2 o'clock P. M.

This farm has upon it two good residence buildings, good barns and other outbuildings, is within reasonable hauling distance of grain elevators at Orient, Duvall and Ashville, Ohio. Appraised at $100 per acre.

Two Points of View.

Here is an aphorism by Von Broecklin: "Yesterday is dead—forget it. Tomorrow does not exist—don't worry. Today is here—use it." That is all right, from one point of view. There is another way to look at it, however. It is this: The past is gone irrevocably. The present has become the past, even while you think about it. Therefore, there is nothing left to you but the future. Now, what do you think about that?

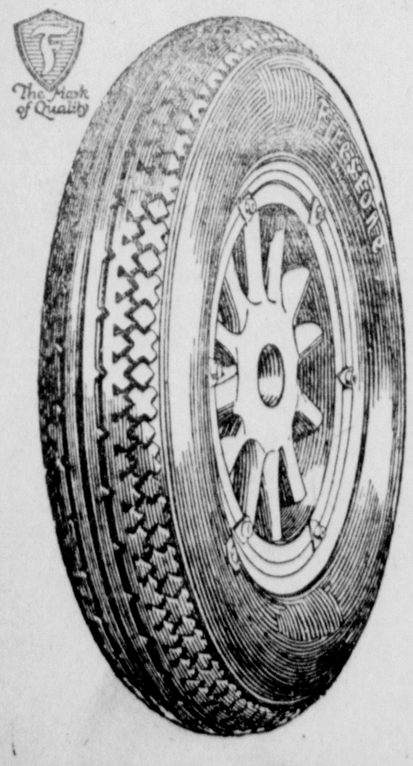
It's Economy to Trade Your Old Tires For

FULL-SIZE Firestone BALLOON GUM-DIPPED CORDS



BECAUSE Balloon Gum-Dipped Cords reduce your repair bills and lower fuel costs, increase tire mileage, car life and the resale value of your car.

These are strong statements but are backed by actual facts.

Balloon-equipped test cars and taxicabs have now been driven over 5,300,000 miles, under Firestone supervision and show reduction in fuel consumption, and less delay, because of fewer punctures and quicker starts and stops.

Many leading automobile makers have standardized on these full-size Balloons—pioneered by Firestone and made practical and economical through the special Firestone gum-dipping process.

Over 100,000 motorists are today using and enjoying the satisfaction of genuine, full-size Balloon Gum-Dipped Cords.

In fact, in three months the sales of Firestone Balloon Gum-Dipped Cords increased 590%.

Have your car equipped now—for comfort and for the safety of driving this Fall and Winter. Be prepared for mud holes, frozen ruts, dangerous snow and ice. We can equip your car immediately at the new low prices now in effect.

Active Volcanoes

Between 600 and 700 volcanoes have been counted in various parts of the world, and of these 270 are still on the active list. Vesuvius was silent for over 2,000 years before it suddenly woke up and in a few hours destroyed Pompeii. Etna is known to have been active as far back as 500 B. C. In 1186 it destroyed 15,000 people; since when at varying intervals it has been the scene of a number of disasters.

Names Perpetuated

The "henry" is the practical unit of induction in the measurement of self and mutual induction. It was named in honor of Joseph Henry, who contributed greatly to the world's store of knowledge regarding electricity. In like manner was the watt, the practical unit of power or activity, named for James Watt, the mechanical engineer, famous for his improvements of the steam engine.

COZY HOME FOR SALE.

FATHER WAS A RADIO FAN

By KATE M. SPRENGER

(©, 1924, by McClure Newspaper Syndicate.)

THE family lived in Boston.

Father was a radio fan; seemingly an incurable one. There was absolutely no doubt about it, for everybody, from the grocer and the motorman, to the head of his firm, and his lawyer, knew about it. But, most of all, his wife was sure of it.

If she called him for supper at 5:30, father would arrive somewhere around seven, explaining that he had heard, just as clear as a bell, what he was sure was Canada or Honolulu; but, not wanting to keep mother waiting, he most considerately came before waiting for the announcement, because, "You know from such a great distance there is considerable interference at times, and it is not always possible to get the announcement immediately," he explained.

He read every magazine and every article in the newspapers regarding radio; even the advertisements did not escape his notice.

Every time father read of some new improvement pertaining to radio, or of a new hookup (there were several new ones mentioned daily in the various papers he bought), he would have to try them, being sure that they were better than any he had ever tried before. Radio, all sizes and shapes and in all stages of development, were to be found in practically every room in the house, and when a crash was heard, mother never even bothered to investigate, for she knew that one of the children had tripped over a wire, or that a battery had rolled out from under the bed.

Mother said nothing, but thought her share. Besides it would have been quite useless to speak to father, for with the receivers clamped tightly over his ears from the time he got home from the office until the wee small hours of the morning, she would never have received an answer anyway. She decided that unless she spoke to him through a broadcasting station he would never hear her.

Finally, one evening, mother got the surprise of her life when father came to supper just as soon as he was called. Mother looked at him anxiously, and solicitously inquired whether he felt perfectly well; but father continued to wear "the smile that won't come off." After a while he cleared his throat and announced, in very important, serious tones:

"Family, at last I have made a radio which will give me messages from Canada and California just as clearly as local stations. Mother, please ask your folks to come over Wednesday evening; your father may profit by my experience; and you might as well ask the Joneses down stairs.

"Ethel, why don't you ask your young man to come over too, for (with a sly wink at mother) when he gets married he will probably want a radio and I can tell him a few things." (Right there Ethel asserted that there would never be a wedding if she was to become the radio widow mother had turned into).

At last the eventful night arrived. The house was crowded, for it seemed that father had invited practically every friend and acquaintance; and after giving them a lengthy description of the wonderful messages he received daily, he requested all to remain silent.

This request would have been quite unnecessary, for the alternately mournful and then terrifying screeches which emanated from the set would have drowned out double the amount of voices. Then, after a final moan from the radio, as though too weary to proceed any farther, father announced dramatically:

"Folk, I now have either northern Canada or Iceland, just as I have heard it many times before. Through this loud speaker you will be able to hear every word when the announcer gives the station."

All heard strains of music.

Then came the most important event of the evening. The song (supposedly in Iceland or northern Canada) had been concluded, and after a brief period of time they heard:

"The song you have just listened to was s-k-w-e-e-e-e-k by q-u-a-a-a-a-k."

Then, clearly: "This is WXYZ, Boston."

Father no longer spends his time trying to get Iceland on the radio.

Steel Shavings Burn

A pile of steel shavings recently took fire at a large dynamo factory, presenting the unusual spectacle of a bonfire of steel. The shavings became heated from some rubbish burning nearby, and water proved useless in extinguishing the blazing steel. It was finally necessary to rake the pile apart in order to subdue the flames.

In such a pile of steel oxidation takes place faster than the resulting heat can be carried away, and any heating from an outside source may actually lead to combustion.

He Knew

An Englishman was on a walking tour in the Highlands, and as he reached the outskirts of Dunkeld he espied an old man standing on the bridge staring contemplatively at the river.

Going up to him, he inquired, pleasantly, "Can you tell me where I can get a good drink in this village?"

The old man smiled craftily and shook his head.

"Na, na, I canna do that, mister," he replied, "but I can tell ye whaur you can get two."

Ear Splitting Silence

Flynn and O'Leary were employed as extra men in the repair shop of a large hardware concern. The "boys" were all old friends and they jostled and sang and whistled without letup.

Said Flynn: "This is the noisest place I iver worked in, Pat."

Said O'Leary: "I believe, ye, Mike. Th' only toime it's quiet here is whin some one stharts the gas engine and drowns th' noise."—Good Hardware.

To Clean Painted Walls

It will aid greatly in cleaning the painted walls if they are gone over with thin uncooked starched water. Painted walls and woodwork can be cleaned easily and well by using equal parts of vinegar and kerosene. Wash with a cloth and dry with a dry cloth.

Would Conscript Girls

Girls should be conscripted and taught the domestic arts, and thus relieve the house-help shortage, declares a New Zealand statesman.

Not Dissuaded

"Darling, will you marry me?" "Have you seen mother?" "Yes, but I still love you."—Aggie Squib.

TODD'S AUTO INN

FIRST GARAGE EAST OF COURT HOUSE

"The open way to what is right and fair is thro' knowledge of the facts"

Frankly Discussing Natural Gas Facts

Apportioning Gas Cost Properly

WE can all agree on this proposition, that in order to supply gas to you a sufficient amount of money must be paid by you to the gas company to enable it to produce, transport and distribute this fuel, and also have a reasonable earning upon its property value. We should agree on this because it is a principle established by constitutional law, and essential to the success of all business enterprises.

The means or methods that may be employed to secure this sufficient income is of much less importance to the company than it is to the consumer, but it is manifestly unfair that a very great number in possession of gas service never pay enough for it to cover its cost, which deficit necessarily must be collected from the balance of the gas company's patrons.

This manifest unfairness has been well known in utility experience for years. In some classes of utility service it has recently been corrected, but only after the most strenuous efforts to convince those imposed upon of the unfairness of placing on them an additional burden that rightfully belongs to others.

The cost of service is practically uniform to all consumers. Each must have a saddle and tap, a service line, curb box, curb cock and a meter installed by the company, and duly tested for leakage. Each must be entered upon the ledgers, all meters must be read each month whether gas is used or not, bills must be rendered and printing and postage paid, all premises must be repeatedly inspected and safety supervision exercised over them. Turn-offs and turn-ons must be made as requested, curb boxes replaced when broken, service lines replaced or relocated as street paving and improvements make necessary. All receive the same attention, and the expense is approximately the same, but the wide difference appears when the income from each is computed. We know that four years ago more than sixty percent of our consumers did not pay enough to equal the cost of maintaining the service, and that today more than seventy percent of our business is non-profitable. By reason of the inequitable method of payment of the income so necessary in sustaining the business the charges that rightfully belong to the seventy percent must be assumed and paid by the remaining thirty percent.

A very considerable number of people in possession of service and carried upon the books as consumers use no gas whatever. Another large group use so little gas that their payments do not equal the cost of serving them. Still another class of consumers pay only enough to meet the expense of service, but no profit whatever. This unprofitable patronage equals more than seventy percent of the whole, and on account of these conditions the thirty percent or profitable patrons must pay a very much higher amount for gas and service.

The only fair and just way to correct this inequality and manifest injustice is to establish a cost-of-service charge for each and every consumer. Let each one pay the fixed expense connected with the establishment and maintenance of service, and then the cost of gas will be less than it must be if the service charge is not paid and will be exactly the same to all. The cost of service to all must be met by the income derived from sales of gas, and we want to ask you in all fairness if thirty percent of the consumers should pay all necessary charges to sustain their own service, and in addition, enough more to make up the cost and expense of furnishing gas to seventy percent whose service is a distinct drain upon the company's resources and that of its profitable patrons.

What do you think of this proposition?

THE LOGAN GAS COMPANY
258 East Gay Street Columbus, Ohio

N. B.—This is one of a series of articles concerning natural gas conditions as they particularly concern our patrons and ourselves.

2septd2.

SOCIAL CALENDAR

The country home of Mrs. Mary E. Justus in Washington township ,was the scene of a pretty wedding on Sunday afternoon, August 31, at 4 o'clock when her youngest daughter, Miss Grace Lucille became the wife of Mr. Merl Monroe Markwood, son of Mr. and Mrs. H. M. Markwood, of Lancaster. The impressive ring service was performed by Rev. D. S. Mills in the presence of thirty-five guests, immediate relatives of the bride and groom. Preceding the ceremony Miss Kathleen Dilsaver, a niece of the bride, sang "Oh, Promise Me" and "I Love You Truly." Miss Ruby Zeimer, presided at the piano and as the first strains of Lohengrin's wedding march were heard, Miss Dorothy Justus and Miss Grace Markwood entered daintily gowned in pink organdy carrying baskets of flowers from which long strands of pink and white satin ribbon fell and formed the aisle from the door to the altar. The altar was placed in one corner of the room under an arch. The background was made lovely by ferns, growing plants and bouquets of cut flowers. The color scheme was pink and white and was successfully carried out in many parts of the house. Little Miss Velma Marie Calvert, daughter of Mr. and Mrs. B. R. Calvert, wore a dress of white crepe-de-chine and carried a white rosebud which concealed the ring. She entered with the Rev. D. S. Mills and each took their place behind the altar Miss Lucile Markwood, a sister of the groom, acting as brdesmaid and Mr. Paul Justus, a brother of the bride, as best man then entered. Last came the bride and groom and proceeded to the place between Miss Markwood and Mr. Justus at the altar. The bride wore a gown of white georgette over satin with Oriental lace and satin ribbon trimmings. Her veil was of white tulle held in place by by a bandeau of orange blossoms and silver foliage. She carried in her arm a bouquet of white Ophelia roses. Miss Markwood's dress was of mouse color canton crepe with hat and shoes to match and her flowers were pink roses. Following the ceremony a three course dinner was served. Mrs. Markwood was a teacher in the Washington town ship school. Mr. Markwood is employed at the Home Dairy in Lancaster. They left Monday morning on a motor trip to the northern part of the state. The bride's traveling gown was a navy blue poirre twill suit with black hat and shoes. Upon their return they will be at home on West Fair avenue, Lancaster. Mr. and Mrs. Markwood received many useful gifts and also have the good wishes for their future happiness.

On Sunday, August 31, the Sensenbrenner-Fischer reunion was held in the beautiful grove along Darby creek on the farm of Mr. George Gerhardt. The coalition of these two families marks their first efforts to establish the relationship which exists, but had been so long neglected. The outing proved so successful that it was unanimously decided to make it an annual affair. Mr. William Fischer was elected president and M. A. Sensenbrenner was chosen secretary. The representatives of each family were Mr. and Mrs. Harmon Sensenbrenner, of Paris, Illinois; Miss Emma Sensenbenner, Mrs. Debolt Sensenbrenner, Mr. and Mrs. E. Sensenbrenner, Miss Genevieve Sensenbrenner, Mr. M. A. Sensenbrenner, Miss Alice Hedges, Mrs. Dorothy Fischer, Mr. Frank Fischer, Mr. and Mrs. William Fischer and son William, Mr. and Mrs. George Fischer and children Miss Eva Fischer Miss Katherine Fischer, Mr. and Mrs. Raph Stevenson and children, Mr. and Mrs. Meinard Trump and sons, Alva, Richard and Donald, Mrs. Martin Trump, Miss Magdalene Trump, Mr. and Mrs. Fred Trump, Mr. and Mrs. Harry Trump, Mr. and Mrs. Jacob Bowers and daughter, Dorothy, Mr. and Mrs. George Bowers, Mrs. Mary Thiel, Mr. R. C. Hill, Mrs. Ed Niles and daughter, Minnie.

The fifteeth annual reunion of the Henry C., and Marvin Bowsher Blacker family was held at the home of Mr. and Mrs. J. G. Ward Sunday, August 17. Of the immediate family the following were present: Mrs. E. W. Templin, Mrs. J. G. Ward, Seymour Blacker, John H. Blacker, Mrs. O. P. Brinker, Ella Blacker, Mrs. E. B. O. Dayton, Nettie Blacker. The family was well represented by the children grandchildren and great-grandchildren numbering in all seventy-eight. Those attending from a distance were George M. Blacker and family, Lowell Barnett and J. Russell Moore of Cincinnati; Mr. and Mrs. E. B. O. Dayton of Mt. Vernon, Illinois, and Mr. and Mrs. C. E. Ward, C. S. Ward Jr., of Charleston, West Virginia.

—Mrs. Christian Schwarz is quite ill of quinsy at her home on Watt street.

GERMAN SCHEME IS FOILED BY A DRUG

Sleeping Sickness Cure Bars Dicker for Colonies.

Toronto, Ont.—Germany has lost what little chance she had of recovering her African colonies by trading off for them the formula for curing the sleeping sickness, for France has now the same remedy, or, as the druggists say, "something just as good." Bayer 205 has a rival in Pasteur 309. Such is the announcement of Dr. H. H. Dale, head of the pharmacology department of the national research council, London, physiology section, here at the meeting of the British Association for the Advancement of Science.

When Africa had been partitioned by the allied powers they found much of their territory becoming uninhabitable by the spread of the sleeping sickness, which devastated a belt 2,000 miles long and in places 100 or 200 miles wide, stretching up the Congo from the Atlantic almost to the opposite ocean. The disease was discovered to be caused by the trypanosome, an infinitesimal wriggler carried by the tsetse fly and infecting the blood of man and beast.

German chemists set about to find a drug that would kill the creature without harming its host and after fifteen years of effort succeeded. But meantime Germany had lost her African possessions.

The formula for Bayer 205, or, as it is now called, "Germanin," was kept secret, but it was intimated that it would be disclosed if the allies would return the German colonies, amounting to 1,000,000 square miles. The allies showed no eagerness to buy the recipe at this price, but set their own chemists at work on the problem, following such clues as could be obtained from the prewar Bayer patents.

Now Fourneau, working in the Pasteur institute at Paris, has found that his 309 preparation has "similar and probably as valuable properties" as Bayer's 205.

Injected into the blood it will not only free the animal from the trypanosomes in a few days but render it immune to further infection for months afterward.

All Brands of Flour Tested by This Woman

Uncle Sam, in this case being Miss R. Leone Rutledge, baker chemist of the Department of Agriculture, tests various brands of flour under the same conditions by baking loaves of bread and then testing them for cubic volume. She is shown here about to test a loaf.

Thrifty Bulldog Has His Own Savings Bank Account

Chicago.—Bim Elgert, a bulldog, earns his own cash and deposits it in a bank. So far as known, he is the only dog who has his own bank account.

Bim is owned by Mrs. Orel Elbert of Sheridan road, and he earns his money by going about the premises and putting things in their proper places. He gets a dime for going to bed promptly, and if he whines or barks his pay is cut off. He carries baskets to and from the market and gets an extra quarter for watching the automobile.

Once a week he takes his collection of quarters and dimes to the bank, stands in front of the receiving teller's window on his hind legs, gets his book back and trots home. His balance was $68 with no withdrawals.

Firstborn Said to Lead in Mental Deficiency

London.—Defenders of primogeniture, backbone of the English hereditary principle, received a formidable blow when Dr. Robert Hutchinson stated before the British Medical association that two-thirds of the mentally deficient children he had had to deal with in his practice had been firstborn children.

Defenders of primogeniture point to the efficiency of innumerable European monarchs which history reveals, while the backers of Doctor Hutchinson's contention mention Benjamin Franklin, who was the fifteenth child of his parents, history being mute regarding the achievements of the first fourteen children of Josiah Franklin.

First Steam Hammers

The steam hammer was invented by James Nasmyth, who first conceived the invention in 1839, but did not patent it until 1842. Meanwhile a steam hammer had been actually built at the iron works of Le Creusot, France. The first Nasmyth hammer was erected in 1843 at Bridgewater foundry, at Patricroft, near Manchester, England.

Burning for Centuries

The most ancient of the sacred fires of India still existing was consecrated 12 centuries ago, in commemoration of the voyage made by the Parsees when they emigrated from Persia to India. The fire is fed five times every 24 hours with sandalwood and other fragrant materials, combined with very dry fuel.

Why England Is Merrie

A city gentleman writing to the press claims that he managed to put through a call to the north of Scotland in less than a minute. When all the wrong numbers are engaged, accidents like this are sure to happen.—London Passing Show.
